What is Wavesnode.NET

We are Jarno Hogeweg and Rob van de Camp, proud and dedicated owners of Wavesnode.NET, one of the largest and earliest fullnodes on the Wavesplatform. The Wavesplatform was started in may 2016 by Sasha Ivanov (former NXT). It is a decentralized platform where businesses can easily create their own token and start their blockchain business.

What do we offer

On the Wavesplatform you can setup an ICO (Initial Coin Offering). This is done with easy token creation, but to get the money from your customers, you'll need an ICO website to collect the funds needed to get your ideas running.

We are cooperating with an ICO platform, Lapti (founded by 2 members of the Wavesplatform).

They can help you setup an ICO for your business, create a platform where your clients can pay for your plans in several ways; Bitcoin, Ethereum, Waves, etc. If you are looking for a good party for setting up an ICO we encourage you to contact Lapti, they will help you out with all steps needed.

For a business without technical knowledge about Blockchain or Wavesplatforms' technical side it's hard to take the next step.

When you want to do transactions payed with another token than Waves on the platform you'll need a fullnode that mines enough blocks to make sure all the transactions are processed.

Starting a fullnode on the Wavesplatform is quite expensive, you will need at least 10,000 Waves to start a fullnode.

And even if you have 10k of Waves on your own fullnode, you will not generate enough blocks to pay these transactions with your own token, making it difficult to send large number of transactions to your clients successfully.

That's where Wavesnode.NET's services come to play.

We are running our big fullnode with millions of Waves on it since the start of the Wavesplatform and generate a lot of blocks, guaranteeing your transactions will be processed.

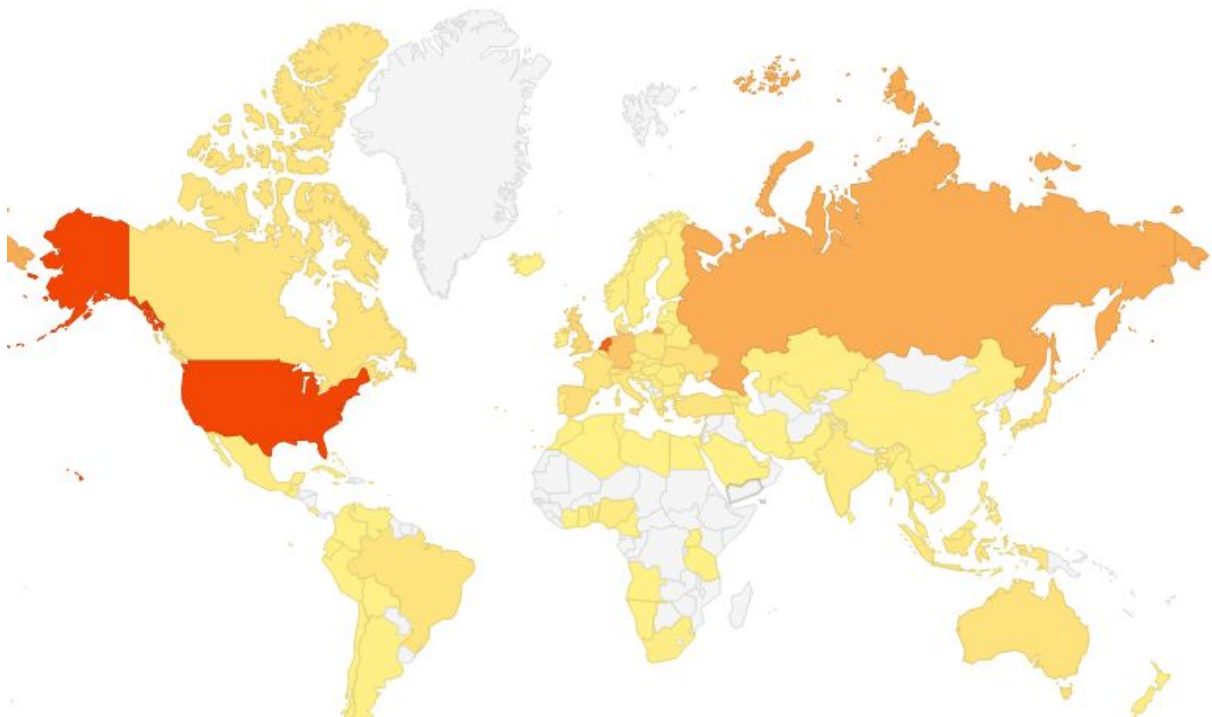

Having the knowledge about the technical part and having a good reputation in the community is key to have your project maximum supported.

What can we do for your business?

We are selling our services, knowledge and usage of our fullnode for your business.

If you want to make payments, pay dividend to your clients, have transactions paid in your own token, you'll name it and we will do it for you.

We even can advertise for you on our Twitter (with loads of Wavesfans as followers, so direct connect to the right target group) or get you listed as supported project on our well visited website.

(our website gets viewed from all over the world)

Official Waves Merchandise

We are also the exclusive place for the official Waves merchandise.

With permission from the Wavesplatform owners we have created a webshop with lots of cool clothing with the official Waves logo's.

We have created the first webshop in the world, accepting payments with a Wavestoken, WNET.

Offering: Waves T-shirts, hoodies, longsleeves, jackets with hoods, polo's, softshells & caps!

Logo's to be printed and stitched.

Take a look at all items at <https://shop.wavesnode.net>

WNET token details

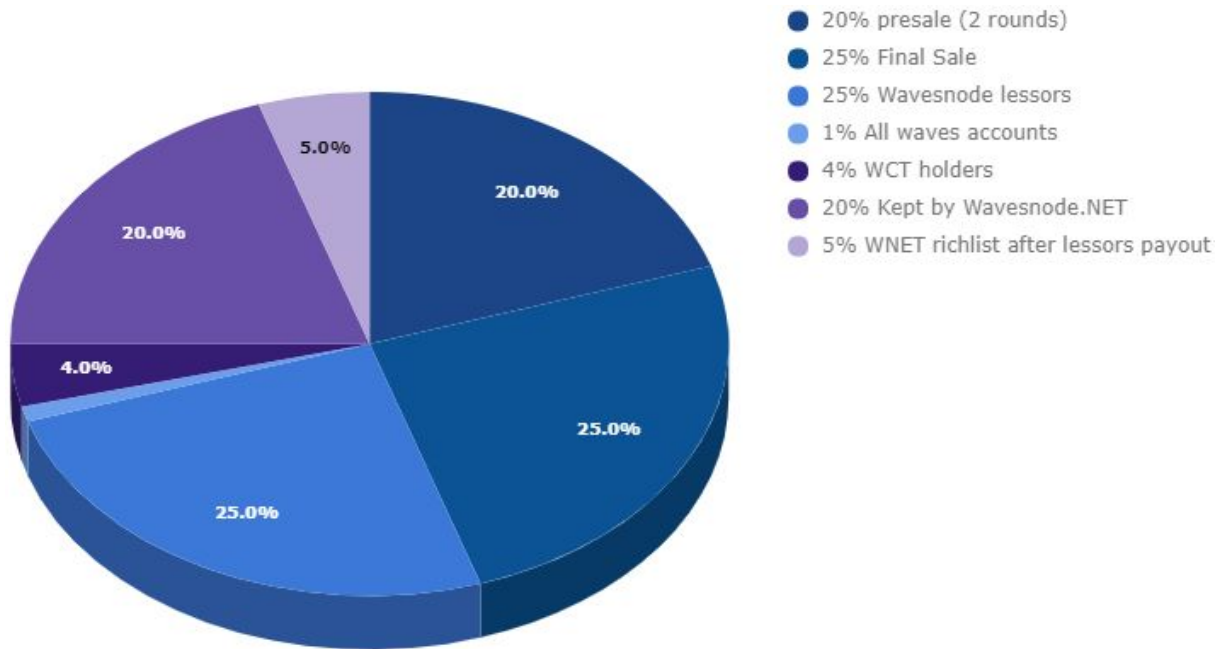

A fixed total of 10 million Wavesnode.NET Tokens have been issued.

- Tokenname: WavesnodeNET
- Symbol: WNET (verified token)
- Token ID: AxAmJaro7BJ4KasYiZhw7HkjwgYtt2nekPuF2CN9LMym
- Supply: 10,000,000 (ten million tokens)
- Decimals: 8
- Re-issuable: no

WNET distribution

Distribution, the airdrop/payments will be done according to the numbers below:

WNET Presale / Airdrop

We have offered our loyal supporters an opportunity to buy in early with a pre-sale of our token. Depending on demand we have planned a maximum of 3 pre-sale rounds.

Round 1: 1.000.000 WNET (10%) for the fixed price of 1337 satoshi.

Round 2: 1.000.000 WNET (10%) for the fixed price of 1337 satoshi.

Round 3: Final sale of 2.500.000 WNET (25%) for the fixed price of 1473 satoshi.

Tokens that are not sold when the pre-sale period will be used by Wavesnode.NET for future expansions and investments like marketing, promotions, IT costs and development.

After our presale period we will airdrop 400.000 WNET to all WCT holders and 100.000 WNET to all waves addresses holding more than 1 wave.

3 months after our release date we will reward WNET holders with airdropping 5% (500.000 WNET) to the rich list.

On top of our weekly payouts to our lessor we will add 40 WNET per block that our node mines. This reward payout schedule will be ongoing for approximately 1 year at the current mining rate, this will of course depend on the size of our LPOS share.

This will mean a grand total of 25% (2.500.000 WNET) will be payed out to our lessors!

WNET buyers

Businesses on the Wavesplatform

Services we provide to businesses on the Wavesplatform:

- Dedicated node mining your own fees, your project will also be listed as supported project on our website, 100,000 WNET
- Mass payment function, 25,000 WNET per airdrop/payout run to WCT holders or your clients (commercial fees paid in WNET included)
- Promoting your project on Twitter, 25,000 WNET
- List your project on our Website, 100,000 WNET

We are always open for cooperations with startups or existing projects on the Waves platform.

Please contact us if you are looking for a (backup) node for your project, or want us to handle your transaction fees, do promotion or list your project.

Businesses are kindly requested to do an airdrop of their token to WNET holders.

Please keep in mind that when extreme market changes happen in WNET price, we will always have the right to adjust the prices for our services accordingly to keep them affordable for our clients and don't outprice ourselves. These decisions will always be made in the best interest of the WNET holders.

WNET Investors / Traders

Services we provide to investors and traders of the WNET token:

- The WNET token is tradable on the Waves Decentralized Exchange (DEX), supply and demand will set a market price.
- Distributions to Waves & WCT holders will increase interest from the general public, thus increasing interest in the WNET token. More interest means a higher value (supply and demand).
- You can vote for strategy and/or policy changes. (future plan)

WNET Holders

Investors will profit from holding Wavesnode.NET Tokens

- 15% Share of LPoS earnings (tokens generated by mining - distributed weekly)
 - 85% of LPoS earnings go to lessors of Wavesnode.NET
- 100% Share of earnings from our clients buying rights to use the mass payment option of our node
- 100% Share of earnings from our clients buying rights to use our node with their own fees
- 100% Share of earnings from our merchandise in our webshop (after production costs are deducted)
- 100% Share of any future business added to Wavesnode.NET
- Receiving airdrops from our clients

What sets WNET value

The WNET token get it's value from trading on the Waves Decentralized Exchange, supply and demand will set it's price.

When a business wants us to do work for them or when merchandise is bought from our webshop, businesses or clients have to buy this with our WNET tokens. This gives the price of our WNET Token a continuous buy pressure.
